Education

University of Central Florida (UCF)

July 2025 – May 2029

Bachelor of Science in Computer Science

GPA: 3.80

- Relevant Coursework: Calculus I & II, Computer Design Architecture, Algorithms & Data Structures

Projects

Dynamic Portfolio Creation Website

Feb 2026 – Present

IEEE @ UCF

- Club developed database where companies can dynamically search for students of potential interest
- Project involved establishment of a **Next.js** based frontend collaboratively developed in a shared repository using **GitHub/Git**
- **Refactored 4 modules** from JavaScript into **TypeScript** and **React**, improving code maintainability and reducing technical debt across the club's website
- **Automated 32 tests** using the Jest testing, eliminating input validation errors
- **Integrated Tally forms with Zapier** to dynamically route submissions into different **Notion databases**
- GitHub Repository: <https://github.com/IEEE-UCF/Member-Portfolio-Service-MPS>

Experience

Web Development Intern

May 2026-Present

Limbitless Solutions
